

EHSAN ELAHI

Backend Developer | AI Engineer | SaaS & Automation Specialist

Islamabad, Pakistan • +92 301 420 5141 • ehsannelahi@gmail.com • linkedin.com/in/ehsan-elahi-b99444156

PROFESSIONAL SUMMARY

Results-driven Backend Developer and AI Engineer with 2+ years of hands-on experience spanning Laravel/PHP backend systems, cross-platform mobile apps (Kotlin & Flutter), and production-grade AI engineering. Currently Laravel & AI Developer at Meta Digital Marketing (Islamabad, UAE-based agency) since mid-2024, following an earlier role as AI Engineer at Marsit Agency. Delivered 6+ production Laravel SaaS platforms, 2 published mobile apps, and a portfolio of LangChain/RAG agentic chatbots and multi-agent automation systems for clients, employers, and personal ventures. Most recently designed and built a full AI-powered e-commerce platform (personal project) featuring four custom AI modules — outfit color matching, real-time apparel-style detection, body measurement, and virtual try-on. Ready to contribute as a backend-focused engineer with strong applied-AI capability from day one.

WORK EXPERIENCE

Backend Developer & AI Engineer — Full-Time

July 2024 – Present | 2+ Years

Meta Digital Marketing | Islamabad, Pakistan (UAE-based Agency)

- Architected and delivered fully dynamic Laravel SaaS platforms with comprehensive admin dashboards, REST APIs, and real-time order management for live UAE-facing clients
- Built and deployed bot.laundryservice.ae — an agentic RAG chatbot using LangChain integrated directly with the Laravel production database, automating end-to-end customer bookings and support
- Developed AYAT Stem, a Flutter education app enabling schools worldwide to manage parent, teacher, and student accounts with interactive quiz-based learning — published on Google Play
- Designed and built a custom WordPress theme for Chocolateshop.ae, tailored to the client's business and branding requirements
- Developed and shipped multiple AI engineering projects: Multi-Agent Newsletter Automation System, Cold Email Generator, AI Real Estate Agentic Chatbot, AI Doctor with Voice and Vision capabilities, and a DeepSeek-R1 reasoning chatbot
- Built 7+ SEO-ranked business websites for UAE markets including LaundryService.ae, CarpetWashing.ae, CurtainCleaning.ae, AlKhyaalCurtain.ae, CurtainLaundry.com, and Sea Hero Watersports
- Developed FastAPI microservices on cloud infrastructure for AI pipeline integrations, vector database workflows, and dataset processing
- Managed full server configuration, cloud deployments, and ongoing production maintenance for all live systems
- Automated AI dataset generation, chunking pipelines, and model fine-tuning workflows using Python, Sentence Transformers, and Hugging Face

AI Engineer

January 2024 – June 2024 | 6 Months

Marsit Agency | Pakistan

- Engineered ContentScan.ai, a production multi-LLM content detection platform with a FastAPI backend and WordPress plugin, serving live client traffic
- Developed backend websites and custom WordPress plugins for agency clients
- Contributed to AI model integration and prompt engineering for client-facing content-analysis tooling

Mobile App Developer — Internship

2023

Edify Group of Companies | Pakistan

- Developed cross-platform mobile application features and contributed to client-facing mobile products
- Gained hands-on experience in mobile app architecture, UI/UX design principles, and production deployment workflows

- Collaborated with a professional development team on agile delivery cycles

Web Developer — Internship

2022 | 6 Months

OPP TECH | Pakistan

- Developed PHP-based web applications including: Emergency Ambulance Hiring Portal, Library Management System, Bidding System, and University/School/College Management System
- Built responsive frontend interfaces using HTML5, CSS3, Bootstrap, JavaScript, and jQuery

Freelance Web & App Developer — WordPress, Shopify & Kotlin

2022 – Present

Self-Employed | Remote

- Designed and developed 10+ live WordPress and Shopify stores across multiple client niches, including manoro.live, alfajewellers.live, rahmeenstorepk.store, and shop.laundryservice.ae
- Built VaultLock: Secure Apps, a native Kotlin Android application, published on Google Play
- Independently designed and built a full AI-powered e-commerce platform (personal portfolio project) — see Freelance & Personal Ventures below
- Services delivered: Shopify theme customisation, WooCommerce setup, e-commerce configuration, domain/hosting management, plugin development, and performance optimisation

BACKEND DEVELOPMENT — LARAVEL PRODUCTION WEBSITES

6+ production-level Laravel platforms built and maintained for live UAE-market clients, each with custom admin dashboards, REST APIs, and database-driven backends.

- **LaundryService.ae** — Full SaaS laundry booking platform with admin dashboard, order management, and integrated AI chatbot
- **CarpetWashing.ae** — SEO-optimised service platform with dynamic CMS and mobile-first responsive design
- **CurtainCleaning.ae** — Service booking platform with dynamic CMS and SEO-optimised architecture
- **AlKhyalCurtain.ae** — Service booking platform with admin management and responsive UI architecture
- **CurtainLaundry.com** — SEO-ranked business website with custom Laravel backend
- **Sea Hero Watersports** — Service booking platform with admin management, SEO optimisation, and responsive UI architecture
- **MetaDigitalMarketing.ae** — Corporate website with dynamic CMS, lead-generation architecture, and fully managed content system

MOBILE APP DEVELOPMENT

AYAT Stem — Education App (Flutter)

Technologies: Flutter, Dart, Firebase, REST APIs

- Global education app enabling schools to manage parent, teacher, and student accounts in one platform
- Interactive quiz-based learning system allowing schools worldwide to onboard and manage classes
- Built and published while at Meta Digital Marketing; live on Google Play

VaultLock: Secure Apps (Kotlin)

Technologies: Kotlin, Android SDK, Local Encryption

- Native Android security application for locking and protecting apps and sensitive data on-device
- Published independently on Google Play

AI ENGINEERING PROJECTS

RAG Agentic Booking Chatbot — LaundryService.ae — bot.laundryservice.ae

Technologies: LangChain, RAG, Laravel, MySQL, FastAPI, Vector Database

- Built an agentic AI chatbot that handles real-time customer bookings end-to-end without human intervention
- Integrated directly with the Laravel production database for live order creation and management

- Implemented RAG architecture to answer dynamic service, pricing, and availability queries with high accuracy
- Deployed on UAE production environment serving live customers daily — measurably reduced customer service workload

ContentScan.ai — AI Content Detection Platform — contentscan.ai (Marsit Agency)

Technologies: Python, Multi-LLM Integration, FastAPI, WordPress Plugin

- Production-grade AI content detection platform serving real client traffic with high-accuracy classification
- Integrated multiple LLM models for content analysis and scoring with a WordPress plugin for frontend integration
- Handled full server setup, CI/CD deployment pipeline, and ongoing production maintenance

Multi-Agent Newsletter Automation System

Technologies: LangGraph, Multi-Agent Architecture, Python, LLM APIs

- Designed a multi-agent pipeline for automated newsletter research, writing, and formatting using LangGraph
- Agents collaborate autonomously to gather data, summarise content, and produce ready-to-send newsletters

AI Real Estate Agentic Chatbot

Technologies: LangChain Agents, RAG, Python, Vector Database

- Fully agentic assistant for property search, Q&A, comparison, and personalised recommendations
- Integrated RAG with live listing data; multi-turn conversational memory for natural user experience

AI Doctor — Voice + Vision Medical Assistant

Technologies: Mistral, Hugging Face, LangChain, RAG, Speech-to-Text, Vision AI, Python

- Medical chatbot grounded in curated health datasets via RAG using Mistral and Hugging Face models
- Extended with voice input and medical image analysis — multimodal architecture combining audio, visual, and text reasoning
- Implemented safety guardrails to prevent hallucinations in sensitive medical contexts

DeepSeek-R1 RAG + Reasoning Chatbot

Technologies: DeepSeek-R1, LangChain, RAG, Python, Vector Database

- Reasoning-augmented chatbot combining RAG retrieval with DeepSeek-R1 chain-of-thought for complex multi-step queries

Cold Email Generator — AI Outreach Automation

Technologies: LangChain, Python, LLM APIs, Prompt Engineering

- Automated personalised cold email generation using advanced prompt engineering for high-converting outreach copy
- Supports batch generation for scalable campaigns based on prospect data inputs

FREELANCE & PERSONAL VENTURES

AI-Powered E-Commerce Platform (Personal Project / Portfolio)

Technologies: Laravel, Python, Computer Vision, Generative AI, RunPod GPU, Vector Database

- Designed and built a fully custom Shopify-style e-commerce platform in Laravel with a user-friendly, SEO-optimised admin dashboard, product photo galleries, and full store management tools for non-technical users
- Built and integrated four independent AI modules into the storefront:
 1. Outfit Color-Match Chatbot — customer uploads a photo, and the chatbot recommends clothing colors suited to their skin tone
 2. Real-Time Style Detector — computer vision model running on live CCTV/webcam feeds to classify shoppers as wearing eastern or western attire, feeding aggregate insights to the admin dashboard
 3. Body Measurement Module — uses live camera input to estimate body measurements for custom-stitched suit orders placed directly through the store

- 4. Virtual Try-On Module — customer uploads or captures a photo, selects a fabric or suit, and a trained generative model renders a preview image of the garment on them; model trained and deployed on RunPod GPU infrastructure and called live from the storefront

Freelance WordPress & Shopify Stores

Technologies: WordPress, Shopify, WooCommerce, PHP

- Designed and developed 10+ live e-commerce stores including manoro.live (full product catalogue, payments, delivery) and alfajewellers.live (Shopify jewellery store with payment integration)
- Delivered rahmeenstorepk.store and shop.laundryservice.ae, along with several additional client stores

LIVE PRODUCTION PROJECTS

LaundryService.ae Full SaaS laundry booking platform with admin dashboard, order management, and AI chatbot serving live UAE customers	CarpetWashing.ae SEO-optimised service platform with dynamic CMS, mobile-first responsive design, live UAE deployment
MetaDigitalMarketing.ae Corporate website with dynamic CMS, lead generation architecture, and fully managed content system	AlKhyalCurtain.ae Sea Hero Watersports Service booking platforms with admin management, SEO optimisation, and responsive UI architecture
AYAT Stem (Google Play) Flutter education app for schools worldwide — quizzes, parent/teacher/student account management	Chocolateshop.ae Custom WordPress theme built to client business requirements
VaultLock: Secure Apps (Google Play) Native Kotlin Android app for app-locking and on-device data protection	manoro.live alfajewellers.live Live freelance Shopify/WordPress stores — full product catalogue, payments, and delivery

TECHNICAL SKILLS

Backend	Laravel (MVC, REST API) PHP Python FastAPI Node.js (Basic) MySQL MongoDB Server Configuration Cloud Deployment
Mobile	Kotlin Flutter Dart Android SDK Cross-Platform UI App Architecture Google Play Deployment
AI & ML	LangChain LangGraph RAG Architecture Multi-Agent Systems Mistral DeepSeek-R1 OpenAI / GPT APIs Hugging Face Sentence Transformers Computer Vision Generative AI (Image) Vector Databases Prompt Engineering Voice & Vision AI RunPod GPU Deployment
Frontend	HTML5 CSS3 JavaScript jQuery Bootstrap Responsive UI Design
CMS / E-Com	WordPress Shopify Customisation WooCommerce Theme Building Custom Plugin Development
Tools	Git & GitHub Postman Dataset Generation & Chunking AI Model Integration CI/CD

EDUCATION

Bachelor of Science — Computer Science

2022 – 2026 (Expected)

University of Central Punjab | Pakistan
